## Declaration

I philip Rowse, CTO of CubePilot Pty Ltd (Australia) Declare the following

CubePilot Pty Ltd is an Australian Company with Australian, New Zealand, and Indian ownership. The declaration here is regarding the products listed in the next section of this document.

CubePilot Pty Ltd declares the following the Parts listed in this documentation

1. Do not contain critical components from any Covered Foreign entity.
2. Are not manufactured by a covered foreign entity
3. CubePilot Pty Ltd is an Australian company with no Covered Foreign ownership.
4. All the products are manufactured in TW/USA owned factories.
5. Blue products are manufactured in the USA in Fremont California.
6. Non-Blue Products are manufactured in Taipei, Taiwan

Signed

## Supporting documentation

### Section 848 of the FY2020 NDAA

<https://www.govinfo.gov/content/pkg/PLAW-116publ92/html/PLAW-116publ92.htm>

SEC. 848. <<NOTE: 10 USC 2302 note.>> PROHIBITION ON OPERATION OR PROCUREMENT OF FOREIGN-MADE UNMANNED AIRCRAFT SYSTEMS.

(a) Prohibition on Agency Operation or Procurement.--The Secretary of Defense may not operate or enter into or renew a contract for the procurement of--

(1) a covered unmanned aircraft system that--

(A) is manufactured in a covered foreign country or by an entity domiciled in a covered foreign country;

(B) uses flight controllers, radios, data transmission devices, cameras, or gimbals manufactured in a covered foreign country or by an entity domiciled in a covered foreign country;

(C) uses a ground control system or operating software developed in a covered foreign country or by an entity domiciled in a covered foreign country; or

(D) uses network connectivity or data storage located in or administered by an entity domiciled in a covered foreign country; or

(2) a system manufactured in a covered foreign country or by an entity domiciled in a covered foreign country for the detection or identification of covered unmanned aircraft systems.

(b) Exemption.--The Secretary of Defense is exempt from the restriction under subsection (a) if the operation or procurement is for the purposes of--

(1) Counter-UAS surrogate testing and training; or

(2) intelligence, electronic warfare, and information warfare operations, testing, analysis, and training.

(c) Waiver.--The Secretary of Defense may waive the restriction under subsection (a) on a case by case basis by certifying in writing to the congressional defense committees that the operation or procurement is required in the national interest of the United States.

(d) Definitions.--In this section:

(1) Covered foreign country.--The term ``covered foreign country'' means the People's Republic of China.

(2) Covered unmanned aircraft system.--The term ``covered unmanned aircraft system'' means an unmanned aircraft system and any related services and equipment.

Executive order 13981

<https://www.federalregister.gov/documents/2021/01/22/2021-01646/protecting-the-united-states-from-certain-unmanned-aircraft-systems>

## Protecting the United States from Certain Unmanned Aircraft Systems

By the authority vested in me as President by the Constitution and the laws of the United States of America,

I, DONALD J. TRUMP, President of the United States of America, find that additional actions are necessary to ensure the security of Unmanned Aircraft Systems (UAS) owned, operated, and controlled by the Federal Government; to secure the integrity of American infrastructure, including America's National Airspace System (NAS); to protect our law enforcement and warfighters; and to maintain and expand our domestic industrial base capabilities.

Accordingly, I hereby order:

**Section 1. Policy.** UAS have tremendous potential to support public safety and national security missions and are increasingly being used by Federal, State, and local governments. UAS are used, for example, to assist law enforcement and support natural disaster relief efforts. Reliance on UAS and components manufactured by our adversaries, however, threatens our national and economic security.

United States Government operations involving UAS require accessing, collecting, and maintaining data, which could reveal sensitive information. The use of UAS and critical components manufactured and developed by foreign adversaries, or by persons under their control, may allow this sensitive information to be accessed by or transferred to foreign adversaries. Furthermore, the manufacturing of UAS involves combining several critical components, including advanced manufacturing techniques, artificial intelligence, microelectronic components, and multi-spectral sensors. The Nation's capability to produce UAS and certain critical UAS components domestically is critical for national defense and the security and strength of our defense industrial base.

It is the policy of the United States, therefore, to prevent the use of taxpayer dollars to procure UAS that present unacceptable risks and are manufactured by, or contain software or critical electronic components from, foreign adversaries, and to encourage the use of domestically produced UAS.

**Sec. 2. Reviewing Federal Government Authority to Limit Government Procurement of Covered UAS.**

(a) The heads of all executive departments and agencies (agencies) shall review their respective authorities to determine whether, and to what extent consistent with applicable law, they could cease:

- (i) directly procuring or indirectly procuring through a third party, such as a contractor, a covered UAS;
- (ii) providing Federal financial assistance (*e.g.*, through award of a grant) that may be used to procure a covered UAS;
- (iii) entering into, or renewing, a contract, order, or other commitment for the procurement of a covered UAS; or
- (iv) otherwise providing Federal funding for the procurement of a covered UAS.

(b) After conducting the review described in subsection (a) of this section, the heads of all agencies shall each submit a report to the Director of the Office of Management and Budget identifying any authority to take the actions outlined in subsections (a)(i) through (iv) of this section.

**Sec. 3. *Reviewing Federal Government Use of UAS.*** (a) Within 60 days of the date of this order, the heads of all agencies shall each submit a report to the Director of National Intelligence and the Director of the Office of Science and Technology Policy describing the manufacturer, model, and any relevant security protocols for all UAS currently owned or operated by their respective agency, or controlled by their agency through a third party, such as a contractor, that are manufactured by foreign adversaries or have significant components that are manufactured by foreign adversaries.

(b) Within 180 days of the date of this order, the Director of National Intelligence, in consultation with the Secretary of Defense, the Attorney General, the Secretary of Homeland Security, the Director of the Office of Science and Technology Policy, and the heads of other agencies, as appropriate, shall review the reports required by subsection (a) of this section and submit a report to the President assessing the security risks posed by the existing Federal UAS fleet and outlining potential steps that could be taken to mitigate these risks, including, if warranted, discontinuing all Federal use of covered UAS and the expeditious removal of UAS from Federal service.

**Sec. 4. *Restricting Use of UAS On or Over Critical Infrastructure or Other Sensitive Sites.*** Within 270 days of the date of this order, the Administrator of the Federal Aviation Administration (FAA) shall propose regulations pursuant to section 2209 of the FAA Extension, Safety, and Security Act of 2016 ([Public Law 114-190](#)).

**Sec. 5. *Budget.*** (a) The heads of all agencies shall consider the replacement of covered UAS to be a priority when developing budget proposals and planning for the use of funds.

(b) The Director of the Office of Management and Budget shall work with the heads of all agencies to identify possible sources of funding to replace covered UAS in the Federal fleet in future submissions of the President's Budget request.

**Sec. 6. Definitions.** For purposes of this order, the following definitions shall apply:

(a) The term “adversary country” means the Democratic People's Republic of Korea, the Islamic Republic of Iran, the People's Republic of China, the Russian Federation, or, as determined by the Secretary of Commerce, any other foreign nation, foreign area, or foreign non-government entity engaging in long-term patterns or serious instances of conduct significantly adverse to the national or economic security of the United States.

(b) The term “covered UAS” means any UAS that:

(i) is manufactured, in whole or in part, by an entity domiciled in an adversary country;

(ii) uses critical electronic components installed in flight controllers, ground control system processors, radios, digital transmission devices, cameras, or gimbals manufactured, in whole or in part, in an adversary country;

(iii) uses operating software (including cell phone or tablet applications, but not cell phone or tablet operating systems) developed, in whole or in part, by an entity domiciled in an adversary country;

(iv) uses network connectivity or data storage located outside the United States, or administered by any entity domiciled in an adversary country; or

(v) contains hardware and software components used for transmitting photographs, videos, location information, flight paths, or any other data collected by the UAS manufactured by an entity domiciled in an adversary country.

(c) The term “critical electronic component” means any electronic device that stores, manipulates, or transfers digital data. The term critical electronic component does not include, for example, passive electronics such as resistors, and non-data transmitting motors, batteries, and wiring.

(d) The term “entity” means a partnership, association, trust, joint venture, corporation, government, group, subgroup, other organization, or person.

(e) The term “Intelligence Community” has the same meaning set forth for that term in section 3003(4) of title 50, United States Code.

(f) The term “National Airspace System” (NAS) means the common network of United States airspace; air navigation facilities, equipment, and services; airports or landing areas; aeronautical charts, information, and services; related rules, regulations, and procedures; technical information; and manpower and material. The term also includes system

# CubePilot

components shared jointly by the Departments of Defense, Transportation, and Homeland Security.

(g) The term “Unmanned Aircraft Systems” (UAS) means any unmanned aircraft, and the associated elements that are required for the pilot or system operator to operate safely and efficiently in the NAS, including communication links, the components that control the unmanned aircraft, and all critical electronic components. The term UAS does not include any separate communication device, such as a cellular phone or tablet, designed to perform independently of a UAS system, which may be incorporated into the operation of a UAS.

**Sec. 7. General Provisions.** (a) Nothing in this order shall be construed to impair or otherwise affect:

(i) the authority granted by law to an executive department or agency, or the head thereof; or

(ii) the functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.

(b) This order shall be implemented consistent with applicable law and subject to the availability of appropriations.

(c) This order is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

A handwritten signature in black ink, appearing to be a stylized name with several sharp peaks and valleys.
